Hello, We are PSPDFKit!

Since 2011, PSPDFKit has been dedicated to providing the industry leading PDF framework. With clients ranging from boutique app developers to Fortune 500 companies including Dropbox, Evernote, IBM, Atlassian, PSPDFKit is trusted by over 1000+ customers worldwide.

"We are the engine that helps other teams build their dream cars."

– PSPDFKit's CEO, Peter Steinberger

The Leading Global PDF Framework

Peter Steinberger, the creator and CEO of PSPDFKit, along with Jonathan Rhyne, PSPDFKit's COO, knew that an app would be necessary in order to showcase the full extent of PSPDFKit's technology but were not interested in building just a sample app.

"Our goal was to make a premium app that shows everything our SDK can do and does not require a login or some form of payment from mainstream users." Rhyne says. Thus, after more than two years of dedication, PSPDFKit has made its technology available to consumers with the release of its new app, PDF Viewer 1.0 for Android, now available on the Google Play Store.

PDF Viewer 1.0 for Android

The highly anticipated productivity app: PDF Viewer maximizes productivity enabling users to view, search, and annotate PDF documents with ease on their Android phone, tablet, or Chromebook.

Fast Facts

- While still in beta, PDF Viewer 1.0 for Android was featured by Google in its Early Access category on the Play Store

- 11,270 active users worldwide within two weeks of release

- Average Rating 4.60
